CONTENTS

The Green Journal

January 2015 Volume 128/Number 1

EDITORIALS

- 1 **A Decade of Work and Progress**
Joseph S. Alpert, Pamela Powers Hannley, and Imo Baird
- 3 **Successful Treatment of Hepatitis B and C: Don't Forget the Liver!!!**
Thomas D. Boyer and Shahid Habib
- 5 **Trends in Noninvasive Testing for Coronary Artery Disease: Less Exercise, Less Information**
S. Michael Gharacholou and Patricia A. Pellikka
- 8 **Stop Talking 'Dirty': Clinicians, Language, and Quality of Care for the Leading Cause of Preventable Death in the United States**
John F. Kelly, Sarah E. Wakeman, and Richard Saitz

COMMENTARY

- 10 **Narcolepsy: Let the Patient's Voice Awaken Us!**
Julie Flygare and Sairam Parthasarathy

REVIEW

- 14 **Ambulatory Blood Pressure Monitoring in Clinical Practice: A Review**
J. Rick Turner, Anthony J. Viera, and Daichi Shimbo

Ambulatory blood pressure monitoring can rule out white coat hypertension and prevent the prescription of unnecessary antihypertension medications.

DIAGNOSTIC DILEMMA

- 21 **The Root of This Evil: Microangiopathic Hemolytic Anemia and Renal Failure**
Xingxing S. Cheng, Srinath Adusumalli, Harshabad Singh, Jacqueline W. DePasse, R. Neal Smith, and Garner T. Hauptert, Jr

IMAGES IN DERMATOLOGY

- 24 **A Blistering Response: Concurrent Psoriasis and Pemphigus Foliaceus**
Drew JB. Kurtzman, Michael Christopher, Fangru Lian, and James E. Sligh

IMAGES IN RADIOLOGY

- 27 **Something More Sinister: Middle Fossa Meningioma**
Maxime Mermoud, Christian Simon, Roy Thomas Daniel, Philippe Pasche, Marc Levivier, and Mercy George

CLINICAL RESEARCH STUDIES

- 30 **History of Thyroid Disorders in Relation to Clinical Outcomes in Atrial Fibrillation**
Helene Bruere, Laurent Fauchier, Anne Bernard Brunet, Bertrand Pierre, Edouard Simeon, Dominique Babuty, and Nicolas Clementy

History of hyperthyroidism was not an independent risk factor for stroke/systemic embolism in atrial fibrillation patients in this study. These data suggest no additional benefit of inclusion of thyroid dysfunction in thromboembolic prediction models in atrial fibrillation.

0002-9343(201501)128:1;1-P

A7

38 Multimorbidity in Heart Failure: A Community Perspective

Alanna M. Chamberlain, Jennifer L. St. Sauver, Yariv Gerber, Sheila M. Manemann, Cynthia M. Boyd, Shannon M. Dunlay, Walter A. Rocca, Lila J. Finney Rutten, Ruoxiang Jiang, Susan A. Weston, and Véronique L. Roger

Multimorbidity involving noncardiovascular conditions adds complexity to the management of heart failure patients.

46 Glycemia and Cognitive Function in Metabolic Syndrome and Coronary Heart Disease

Radhika Avadhani, Kristen Fowler, Corinne Barbato, Sherine Thomas, Winnie Wong, Camille Paul, Mehmet Aksakal, Thomas H. Hauser, Katie Weinger, and Allison B. Goldfine

Higher hemoglobin A_{1c} is associated with lower cognitive function performance scores across multiple domain tests in men with metabolic syndrome and coronary artery disease.

56 Folate Testing in Hospital Inpatients

Patrick Gudgeon and Rodrigo Cavalcanti

Folate deficiency in inpatients is nearly nonexistent. Significant savings could be realized by eliminating routine folate testing of inpatients.

60 Hypokalemia in Acute Medical Patients: Risk Factors and Prognosis

Helene Kildegaard Jensen, Mikkel Brabrand, Pernille Just Vinholt, Jesper Hallas, and Annmarie Touborg Lassen

Hypokalemia is present in 17% of patients with acute medical illness. It is more common among the elderly, women, patients with malignant disease or alcohol abuse, and patients receiving diuretics.

68 Multidisciplinary Care Program for Advanced Chronic Kidney Disease: Reduces Renal Replacement and Medical Costs

Ping Min Chen, Tai Shuan Lai, Ping Yu Chen, Chun Fu Lai, Shao Yu Yang, VinCent Wu, Chih Kang Chiang, Tze Wah Kao, Jenq Wen Huang, Wen Chih Chiang, Shuei Liong Lin, Kuan Yu Hung, Yung Ming Chen, Tzong Shinn Chu, Ming Shiou Wu, Kwan Dun Wu, and Tun Jun Tsai

Patients in a multidisciplinary care program had a 33.6% reduced risk for renal replacement therapy, compared with patients not receiving this program.

77 Measurement of Post-void Residual Bladder Volumes in Hospitalized Older Adults

Zvi Shimoni, Ela Fruger, and Paul Froom

Urinary retention is common in hospitalized patients over 70 years old, but measurement of post-void residual volume has questionable clinical utility.

82 Put a Face to a Name: A Randomized Controlled Trial Evaluating the Impact of Providing Clinician Photographs on Inpatients' Recall

Lora Appel, Howard Abrams, Dante Morra, and Robert C. Wu

Photos of their care team members helped patients remember more of them.

AJM ONLINE

Please note that articles with an “e” page designation are available only in the online version of the Journal at www.amjmed.com.

CLINICAL RESEARCH STUDIES

90.e1 Racial, Social, and Clinical Determinants of Hepatocellular Carcinoma Surveillance

Amit G. Singal, Xilong Li, Jasmin Tiro, Pragathi Kandunoori, Beverley Adams-Huet, Mahendra S. Nehra, and Adam Yopp

Thirteen percent of cirrhosis patients receive annual surveillance, while less than 2% receive biannual surveillance. The data show that there are racial and socioeconomic disparities in cirrhosis monitoring.

90.e9 A Prognostic Score to Identify Low-risk Outpatients with Acute Deep Vein Thrombosis in the Lower Limbs

Javier Trujillo-Santos, Francisco Lozano, Manuel Alejandro Lorente, Dolores Adarraga, Jana Hirmerova, Jorge Del Toro, Lucia Mazzolai, Giovanni Barillari, Manuel Barrón, and Manuel Monreal, the RIETE Investigators

Using 6 easily available variables, the authors identified deep vein thrombosis patients at low risk for developing pulmonary embolism, major bleeding, or death within the first week of therapy.

CLINICAL COMMUNICATIONS TO THE EDITOR

- e1 **Cutaneous Eruptions Associated with Antimicrobials in Patients with Infectious Mononucleosis**
Sarah E.D. Forgie and Thomas J. Marrie
- e3 **Heartache and Bellyache: Limited English Proficiency Perpetuating Recurrent Thromboembolic Events**
Purnema Madahar and Cristina M. Gonzalez
- e5 **First in Man: Amniotic Patch Reduces Postoperative Inflammation**
Zain Khalpey, Katherine M. Marsh, Alice Ferng, Irbaz Bin Riaz, Mark Friedman, Julia Indik, Ryan Avery, Clint Jokerst, and Isabel Oliva
- e7 **Sinus Bradycardia: Can We Blame Ehrlichiosis?**
Poojita Shivamurthy, Saqib Ali Gowani, Rahul Mutneja, Sparsha Kukunoor, Mamta Shah, and Russell Stein

LETTERS

- e9 **All Patients with Leukemia Are Not Equally at Risk of Contracting *Pneumocystis jirovecii* Pneumonia**
Roux Antoine, Bornstain Caroline, and Vincent François, for the GRRROH
- e11 **The Reply**
Pierre Fillatre, Matthieu Revest, and Pierre Tattevin
- e13 **Levothyroxine Dose and Measurement of TSH**
Prasanna Santhanam
- e15 **The Reply**
Jennifer Pecina, Gregory M. Garrison, and Matthew Bernard

- e17 **Use of Digoxin in Chronic Systolic Heart Failure in Current Era**
Yutthapong Temtanakitpaisan, Sneha Kilari, and Rongras Damrongwatanasuk
- e19 **The Reply**
Ali Ahmed, Gregg C. Fonarow, and Robert C. Bourge
- e21 **Evidence of Pulmonary Disseminated Cryptococcosis: Diffuse Multiple Micronodules on Thoracic Computed Tomography**
Takeshi Saraya and Hajime Takizawa
- e23 **'Are There Circumstances Where I Would Refuse to Participate in Caring for a Patient?' Comment to Editorial**
Michael Bornemann
- e25 **Football Lingo in the Medical World**
Kerry O. Cleveland and Michael S. Gelfand

BRIEF OBSERVATION

- 91 **High-dose Intravenous Immunoglobulin Therapy for Systemic Capillary Leak Syndrome (Clarkson Disease)**
Zhihui Xie, Eunice C. Chan, Lauren M. Long, Celeste Nelson, and Kirk M. Druey

AAIM PERSPECTIVES

- 96 **A Review of Learner Impact on Faculty Productivity**
Jeremy Ellis and Richard Alweis
