CONTENTS

*The Green Journal*

September 2021 Volume 134/Number 9

## COMMENTARIES

- 1061 Don't React to Symptoms in Patients with Subclinical Hypothyroid Disease**  
Stuart R. Chipkin and Joseph S. Alpert
- 1063 The Taming of the Flu: Lessons from the Tragedy of COVID-19 and the Absence of an Influenza Season**  
Aaron J. Tande, Matthew Binnicker, and Bjorg Thorsteinsdottir
- 1065 Rediscovering Meaning and Purpose: An Approach to Burnout in the Time of COVID-19 and Beyond**  
Steven Southwick, Leonard Wisneski, and Patricia Starck
- 1068 Polypharmacy in Heart Failure with Reduced Ejection Fraction: Progress, Not Problem**  
Vishal N. Rao, Marat Fudim, Gianluigi Savarese, and Javed Butler
- 1071 Polypharmacy in Heart Failure: Progress But Also Problem**  
Parag Goyal, Sabrina Mangal, Ashok Krishnaswami, and Michael W. Rich
- 1074 Obituary for Bernard Lown**  
Ralf Ostermaier

## REVIEWS

- 1076 A Comprehensive Cardiovascular-Renal-Metabolic Risk Reduction Approach to Patients with Type 2 Diabetes Mellitus**  
Neha J. Pagidipati and Prakash Deedwania
- There are complex cardiovascular and renal risks associated with type 2 diabetes mellitus; it is important to reduce cardiovascular-renal-metabolic disease risk in a comprehensive manner. A cross-disciplinary, team-based model is essential in managing these risks among patients with type 2 diabetes mellitus.*
- 1085 Mechanistic Insights from REDUCE-IT STRENGTHen the Case Against Triglyceride Lowering as a Strategy for Cardiovascular Disease Risk Reduction**  
R. Preston Mason and Robert H. Eckel
- Elevated triglycerides are associated with increased cardiovascular risk; however, current TG-lowering therapies are ineffective in reducing such risk. Although TGs are a potential biomarker of cardiovascular risk, there is scant evidence that triglyceride lowering itself is an effective strategy for reducing such risk.*

**1091 Coronary Artery Calcium: Where Do We Stand After Over 3 Decades?**

Scott M. Grundy and Neil J. Stone

*Coronary artery calcium can be useful in identifying statin eligibility for primary prevention of atherosclerotic disease; coronary calcium testing can better define precise risk status. This allows for a more targeted approach to primary prevention with statin therapy.*

**1096 New Drugs Approved in 2020**

Alex M Ebied, Hesham Elmariah, and Rhonda M Cooper-DeHoff

*This summary of novel drugs approved by the US Food and Drug Administration in 2020 provides clinicians with pertinent prescribing information for each new drug.*

---

**ADVANCING HIGH VALUE HEALTH CARE**

---

**1101 Ensuring Primary Care Diagnostic Quality in the Era of Telemedicine**

Joel Steven Willis, Carl Tyler Jr, Gordon D. Schiff, and Katherine Schreiner

---

**DIAGNOSTIC DILEMMA**

---

**1104 An Elusive Case of Recurrent Gram-Negative Sepsis**

Olaya Brewer Gutierrez and Samuel C Durso

**1107 Troubling Tenosynovitis: When a Serious Sign Persists**

Griffin Reed, Jesse Dabit, and Shreyasee Amin

---

**IMAGES IN DERMATOLOGY**

---

**1110 A Recurrent, Painful, and Vesicular Rash in a Dermatomal Distribution**

Alfredo Siller Jr, Mojahed M.K. Shalabi, Joseph Jebain, and Stephen K. Tying

---

**IMAGES IN RADIOLOGY**

---

**1113 Cavitory Lung Mass Presenting in an Outpatient**

Hsiu-Wu Yang and Yu-Jang Su

---

**CLINICAL RESEARCH STUDIES**

---

**1115 Does Subclinical Hypothyroidism Add Any Symptoms? Evidence from a Danish Population-Based Study**

Allan Carlé, Jesper Scott Karmisholt, Nils Knudsen, Hans Perrild, Bettina Heinsbæk Thuesen, Lars Ovesen, Lone Banke Rasmussen, and Inge Bülow Pedersen

*In subclinical hypothyroidism, comorbidity predicts the presence of numerous symptoms. Clinicians should focus on concomitant diseases rather than expecting symptomatic relief following levothyroxine substitution.*

**1127 Temporal Trends and Patient Characteristics Associated with 30-Day Hospital Readmission Rates after a First Acute Myocardial Infarction**

Mayra Tisminetzky, Jordy Mehawej, Ruben Miozzo, Jerry H. Gurwitz, Joel M. Gore, Darleen Lessard, Hawa O. Abu, Benita A. Bamgbade, Jorge Yarzelski, Edgard Granillo, and Robert J. Goldberg

*Factors associated with an increased risk of rehospitalization include older age, development of acute heart failure during hospitalization, and the presence of several chronic conditions such as kidney disease, diabetes, and peripheral vascular disease.*

**1135 Association of Sex with Outcome in Elderly Patients with Acute Coronary Syndrome Undergoing Percutaneous Coronary Intervention**

Roberta De Rosa, Nuccia Morici, Giuseppe De Luca, Leonardo De Luca, Luca A. Ferri, Luigi Piatti, Giovanni Tortorella, Daniele Grosseto, Nicoletta Franco, Leonardo Misuraca, Paolo Sganzerla, Michele Cacucci, Roberto Antonicelli, Claudio Cavallini, Laura Lenatti, Chiara Leuzzi, Ernesto Murena, Amelia Ravera, Maurizio Ferrario, Elena Corrada, Delia Colombo, Francesco Prati, Federico Piscione, A. Sonia Petronio, Gennaro Galasso, Stefano De Servi, and Stefano Savonitto, for the Italian Elderly ACS Collaboration

*Elderly male and female patients with acute coronary syndrome undergoing PCI show differences in clinical presentation and baseline risk profiles. However, female sex did not prove a significant predictor of mortality after correction for baseline clinical variables.*

- 1142 The Paradox of Readmission Prevention Interventions: Missing Those Most in Need**  
Erik H. Hoyer, Blair Golden, Geoff Dougherty, Melissa Richardson, Diane Lepley, Curtis Leung, Amy Deutschendorf, Daniel J. Brotman, and Rosalyn W. Stewart

*Many patient characteristics associated with the highest readmission risk are also associated with not receiving readmission reduction interventions. Paradoxically, those patients at highest risk of readmission are least likely to accept or receive interventions for preventing readmission.*

- 1148 Risk of Electrolyte Disorders, Syncope, and Falls in Patients Taking Thiazide Diuretics: Results of a Cross-Sectional Study**  
Svenja Ravioli, Shawki Bahmad, Georg-Christian Funk, Christoph Schwarz, Aristomenis Exadaktylos, and Gregor Lindner

*Thiazide use is a clear risk factor for hyponatremia and hypokalemia. Additionally, syncope and falls seem to be causally related to thiazide use. A more careful approach to prescribing thiazide diuretics in elderly patients is recommended.*

- 1155 A Comparative Analysis of Mucormycosis in Immunosuppressed Hosts Including Patients with Uncontrolled Diabetes in the Southwest United States**  
Mohanad Al-Obaidi, Babak Youssefi, James Bardwell, Rory Bouzigard, Christopher H. Le, and Tirdad T. Zangeneh

*Timely surgical treatment and proper antifungal therapy are required to reduce the risk of mortality in patients presenting with mucormycosis. Multispecialty care involving highly specialized surgeons and infectious disease specialists can reduce the risk of mucormycosis complications.*

- 1160 Dietary Choline Supplements, but Not Eggs, Raise Fasting TMAO Levels in Participants with Normal Renal Function: A Randomized Clinical Trial**

Jennifer Wilcox, Sarah M. Skye, Brett Graham, Allyson Zabell, Xinmin S. Li, Lin Li, Shamanthika Shelkay, Xiaoming Fu, Sarah Neale, Cathy O’Laughlin, Kimberly Peterson, Stanley L. Hazen, and W.H. Wilson Tang

*While daily consumption of eggs did not substantially raise fasting concentrations of TMAO or impact platelet reactivity, choline bitartrate supplements providing comparable total choline raised both TMAO and platelet reactivity. The form of choline ingested may differentially influence gut microbiota-dependent TMAO generation.*

## CLINICAL COMMUNICATIONS TO THE EDITOR

- e477 COVID-19 Disease and its Electrocardiographic Manifestations: Our Experience**  
Muhammad Ajmal, Khurram Butt, and Talal Moukabary
- e480 Posterior Circulation Strokes Leave Many Bedside HINTS**  
Staci Saunders, Kevin Braghirol, and Alexander Carbo
- e482 A New Kind of Barrel Chest: Alcoholic Fermentation due to *Candida albicans* in a Pleural Effusion**  
David Tobys, Wibke Johannis, Martin Juebner, and Hendrik Drinhaus
- e484 Deception in the Left Lobe of the Liver**  
Pedram J. Khorsandi, Zohair Ahmed, Cemal Yazici, and Adam E. Mikolajczyk

**e486 Desmopressin as a Novel Long-Term Treatment in Postural Tachycardia Syndrome Patients with Polyuria**

Marie-Claire Seeley, Tilenka R. Thynne, Wilton J Braund, Daniel L Worthley, Celine Gallagher, Prashanthan Sanders, and Dennis H. Lau

**e488 Lateral Cutaneous Nerve Entrapment Syndrome (LACNES)**

Kosuke Ishizuka, Daiki Yokokawa, Takahiro Mori, Tomonori Kato, and Masatomi Ikusaka

**e490 Generalized Lymphadenopathy with Cytopenias**

Ankita Ashoka and Jawad Bilal

**e492 Preoperative Management of Pheochromocytoma with Severe Orthostasis: Addressing the Treatment Challenge of Dopamine Co-Secretion without Alpha-Blockade**

Ruba Riachy, Swati Chopra, Alexis L. McQuitty, and L. Maria Belalcazar

**e494 Parathyroid Hormone-Related Peptide (PTHrp)-Secreting Liver Metastatic Large-Cell Neuroendocrine Carcinoma of the Sigmoid Colon**

Vincent Zimmer and Elke Eltze
