CONTENTS

*The Green Journal*

January 2023 Volume 136/Number 1

## COMMENTARIES

- 1 **Plus ça change, plus c'est la même chose\*** [The More Things Change, the More They Remain the Same.]  
Joseph S. Alpert
- 3 **Newest Guidance and Evidence for Health Care Providers: COVID-19 and Other Vaccines**  
Alexandra Rubenstein, Sarah K. Wood, Vama Jhumkhwala, Mark J. DiCorcia, Dennis G. Maki, and Charles H. Hennekens
- 6 **Revisiting ACCORD: Should Blood Pressure Targets in People With and Without Type 2 Diabetes Be Different?**  
Cindy Xinxin Du, Chenxi Huang, Yuan Lu, Erica S. Spatz, Kasia J. Lipska, and Harlan M. Krumholz
- 9 **The Colorado Option: The Next Staging Ground for Health Equity?**  
Wasan M. Kumar and Eli Y. Adashi
- 12 **Update on Statin Use in Pregnancy**  
Indu G. Poornima, Vishnu Priya Pulipati, Eliot A. Brinton, and Robert A. Wild
- 15 **Five Commonsense Metrics: A Commentary and a Proposal**  
Eric P. Cohen
- 17 **The Ways We Whisper Love**  
Michelle Izmaylov

## REVIEWS

- 19 **The Golden Grapes of Wrath – *Staphylococcus aureus* Bacteremia: A Clinical Review**  
John C. Lam and William Stokes  
  
*Five core interventions ought to be performed for all cases of S. aureus bacteremia: 1) anti-staphylococcal therapy, 2) screening echocardiography, 3) assessment for metastatic phenomena and source control, 4) duration of antimicrobial therapy, and 5) Infectious Diseases consultation.*
- 27 **Therapeutic Dilemmas in Mixed Septic-Cardiogenic Shock**  
Daniela Urina Jassir, Antoine H. Chaanine, Sapna Desai, Indranee Rajapreyar, and Thierry H. Le Jemtel  
  
*Management of patients with sepsis and decompensated heart failure is a balancing act between reversing microvascular dysfunction and aggressive fluid resuscitation while avoiding fluid overload in patients with limited cardiac reserve.*
- 33 **Multiple Myeloma for the Primary Care Provider: A Practical Review to Promote Earlier Diagnosis Among Diverse Populations**  
Joseph Mikhael, Manisha Bhutani, and Craig E. Cole  
  
*The majority of patients diagnosed with multiple myeloma initially present to their primary care provider. Early referral to a hematologist/ oncologist can prevent delays in both accurate diagnosis and treatment.*

0002-9343(202301)136:1;1-N

A7

- 42 **A Practical Guide for Primary Care Providers on Timely Diagnosis and Comprehensive Care Strategies for Hidradenitis Suppurativa**

Amit Garg, Haley B. Naik, and Joslyn S. Kirby

*The authors offer a practical guide with detailed information to support timely diagnosis of this progressive, often undiagnosed inflammatory skin disease; treatment strategies for primary care providers are outlined.*

---

## IMAGES IN DERMATOLOGY

---

- 54 **Heliotrope Rash, Gottron Papules, and Ragged Cuticles in Darker Skin**

Mark C. Marchitto, Isabelle D. Brown, Jaroslaw Jedrych, and Sima Rozati

---

## ECG OF THE MONTH

---

- 57 **Catch Me If You Can: ECG Artifacts**

Golda Harvatin, Jalaj Garg, Dmitry Abramov, Diane Tran, and Purvi Parwani

---

## IMAGES IN RADIOLOGY

---

- 60 **Cerebral Venous Sinus Thrombosis in a Patient with Polycystic Ovary Syndrome**

Yanqi Shao, Xinyi Gao, Peng Wang, Xiaodong He, and Yu Geng

---

## CLINICAL RESEARCH STUDIES

---

- 63 **Evolution of Care and Outcomes Across Surges in Hospitalized Patients with Coronavirus Disease 2019**

Patrick J. O'Hayer, Alexi Vasbinder, Elizabeth Anderson, Tonimarie Catalan, Brayden Bitterman, Ibrahim Khaleel, Grace Erne, Annika Tekumulla, Caroline Tilley, Feriel Presswalla, Namratha Nelapudi, Jiazi Chen, Medha Tripathi, Matthew Rochlen, Loni Rambo, Noor Sulaiman, Penelope Blakely, Yiyuan Huang, Lili Zhao, Rodica Pop-Busui, and Salim S. Hayek

*This analysis of 5 distinct surges of hospitalized patients with COVID-19 at an academic medical center finds that outcomes for these patients have substantially improved, and that the inflammatory burden of COVID-19 has decreased over time.*

- 72 **Relationship Between Marijuana Use and Overactive Bladder (OAB): A Cross-Sectional Research of NHANES 2005 to 2018**

Shenhao Zhu, Zhongyuan Wang, Zhijun Tao, Shangqian Wang, and Zengjun Wang

*Regular marijuana use may increase the probability of developing and suffering from overactive bladder disorder. The use of cannabinoids appears to have little value in the medical treatment of patients with overactive bladder.*

- 79 **Effectiveness and Safety of Direct Oral Anticoagulants Among Octogenarians with Venous Thromboembolism: An International Multidatabase Cohort Study**

Antonios Douros, Frederike Basedow, Ying Cui, Jenny Dimakos, Jochen Walker, Dirk Enders, and Vicky Tagalakis

*Among octogenarians with venous thromboembolism, direct oral anticoagulants showed effectiveness and safety comparable to vitamin K antagonists. The use of DOACs is supported in this high-risk group.*

- 88 **'Bushfire Season' in Australia: Determinants of Increases in Risk of Acute Coronary Syndromes and Takotsubo Syndrome**

Gao Jing Ong, Alexander Sellers, Gnanadevan Mahadavan, Thanh H. Nguyen, Matthew I. Worthley, Derek P. Chew, and John D. Horowitz

*This study of Australian bushfire season shows that in summer, the combination of greater than mean temperature, fine particulate matter, and presence of a bushfire within 200 km doubles the risk of acute coronary syndromes.*

- 96 **The Prevention of COVID-19 in High-Risk Patients Using Tixagevimab–Cilgavimab (Evusheld): Real-World Experience at a Large Academic Center**

Mohanad M. Al-Obaidi, Ahmet B. Gungor, Sandra E. Kurtin, Ann E. Mathias, Bekir Tanriover, and Tirdad T. Zangeneh

*Tixagevimab–cilgavimab is a combination of 2 monoclonal antibodies that can prevent COVID-19 complications in immunocompromised patients who exhibit suboptimal immune responses to vaccines. However, many at-risk patients are not being offered this important preventative therapy.*

- 100 Prosthetic Joint Infections of the Hip and Knee Among the Elderly: A Retrospective Study**  
Anne Spichler-Moffarah, Lee E. Rubin,  
Jenna A. Bernstein, Jane O'Bryan, Erik McDonald,  
and Marjorie Golden

*Patients over 75 years of age with a first episode of prosthetic joint infection following hip or knee arthroplasty presented and were managed similarly to younger patients. Cardiac abnormalities were seen at higher frequencies, and more deaths occurred in those over 75 within 1 year of prosthetic joint infection diagnosis.*

- 108 Acute Increase in Ocular Microcirculation Blood Flow Upon Cholesterol Removal. The Eyes Are the Window of the Heart**  
Tiziana Sampietro, Beatrice Dal Pino,  
Federico Bigazzi, Francesco Sbrana,  
Andrea Ripoli, Enrica Fontanelli, Mascia Pianelli,  
Roberta Luciani, Antonio Lepri, and  
Giacomo Calzetti

*In patients with inherited hypercholesterolemia, optic disk microcirculation showed an acute increase in blood flow upon lipoprotein removal. The vascular system of the eye could represent a versatile biomarker for evaluating systemic microcirculatory health.*

## AJM ONLINE

Please note that articles with an “e” page designation are available only in the online version of the Journal at [www.amjmed.com](http://www.amjmed.com).

## IMAGES IN DERMATOLOGY

- e1 The Evolution of Blue Toe Syndrome in a Diabetic Patient**  
Liling Deng and Wuquan Deng

## IMAGES IN RADIOLOGY

- e3 Wooden Toothpick and Pancreatitis**  
Suely Meireles Rezende, Bruno Bom Furlan, and  
Túlio César de Souza Bernardino

## CLINICAL COMMUNICATIONS TO THE EDITOR

- e5 *Mycobacterium marinum* Infection on Both Hands Masquerading as ‘Eczema’**  
Jiaqi Liu, Qiunan Yao, Wenhao Cheng,  
Hong Ren, and Wenlong Hu

- e7 Repigmentation of Scalp Hair: A Feature of Early Melanoma**  
Julie Gessler, Trilokraj Tejasvi, and  
Scott Conley Bresler

- e9 Brainstem Infarction Presenting with Trigeminal Neuralgia and Bell’s Palsy**  
Terunori Sano, Masayuki Ohira,  
Masashi Mizutani, Kazuhiko Segawa,  
and Masaki Takao

- e10 Vitamin B6 Deficiency Polyneuropathy and Dermatitis**  
Hajime Yasuda, Yasunobu Hoshino, Jun Ando,  
Mayu Miyachi, Monami Osawa,  
Nobutaka Hattori, and Miki Ando

- e12 Nonketotic Hyperglycemic Hemichorea**  
Samuel C.X. Lau and Sandra M.Y. Tan

- e14 Factitious Hypobicarbonatemia in a Patient with Hypertriglyceridemia**  
Akshay Thontakudi, Amresh Kumar,  
Thanh-Mai Vo, and Kana N. Miyata

## AAIM PERSPECTIVES

- 115 Transforming from Coordinator to Manager: Essential Responsibilities of a Successful Residency Program Manager**  
Brandy G. Freiger, Lisa M. Miller,  
Nancy G. Shepherd, and Erin Snow

## PERSONOMICS

- 121 Auto-Phlebotomy**  
David B. Sykes

**On the Cover:** Sampietro et al. *Acute Increase in Ocular Microcirculation Blood Flow Upon Cholesterol Removal. The Eyes Are the Window of the Heart.* Laser speckle flowgraphy (LSFG) analysis. Pre-lipoprotein apheresis LSFG composite perfusion map of the right optic disk. Pixels with high blood flow are red and pixels with low blood flow are blue.
